Documentation index

Every Markdown document in this repository, rendered to PDF under `docs/`. The tree is mirrored, so `results/CANONICAL.md` is at `docs/results/CANONICAL.pdf`.

Regenerate with `make docs-all`. Sources are the Markdown files; **the PDFs are build output and should not be edited.**

Start here

Document	PDF	About
`RUNNING.md`	RUNNING.pdf	**Start here to run it.** Install, verify, predict, reproduce, troubleshoot
`README.md`	README.pdf	Repository overview and the headline result
`docs/HANDBOOK.md`	HANDBOOK.pdf	**Start here to understand it.** A-to-Z: concepts, findings, history, limits
`docs/LLD.md`	LLD.pdf	Low-Level Design. Architecture, the model, results, limitations

Results (generated — never hand-edited)

Document	PDF	About
`results/CANONICAL.md`	results/CANONICAL.pdf	**The source of truth** for the original five-machine dataset
`results/addition1_resolution_and_addition2_report.md`	results/addition1_resolution_and_addition2_report.pdf	Addition 1 Resolution + Addition 2: Learning-Curve Experiment
`results/addition4_compute_benchmark_report.md`	results/addition4_compute_benchmark_report.pdf	Addition 4: Repairing the Compute Microbenchmark and Re-Evaluating
`results/addition4b_mechanism_report.md`	results/addition4b_mechanism_report.pdf	Addition 4b: Verifying the Parallelism Mechanism
`results/addition7_online_loop_report.md`	results/addition7_online_loop_report.pdf	Addition 7: Live On-the-Go Self-Calibrating Loop
`results/buffer_bug_correction_report.md`	results/buffer_bug_correction_report.pdf	Buffer-Bug Dataset Correction
`results/concurrency.md`	results/concurrency.pdf	Concurrency elasticity, fitted and cross-validated
`results/confidence_abstention_report.md`	results/confidence_abstention_report.pdf	Addition 3: Confidence-Aware Abstention
`results/cross_isa_operator_rates.md`	results/cross_isa_operator_rates.pdf	Why the failure is not operator mix
`results/cross_isa_prediction.md`	results/cross_isa_prediction.pdf	The cross-architecture failure and its repair
`results/final_fixes_report.md`	results/final_fixes_report.pdf	Final Technical Improvements: Three Fixes
`results/laptop_to_ec2.md`	results/laptop_to_ec2.pdf	The 59.7% ceiling on scalar capability models
`results/laptop_to_prod.md`	results/laptop_to_prod.pdf	Laptop to eleven production machines
`results/online_predictor_report.md`	results/online_predictor_report.pdf	Online Self-Calibrating

Document	PDF	About
		Prediction: Results
`results/operator_model.md`	results/operator_model.pdf	The capability grid and the ablations
`results/phase7_report.md`	results/phase7_report.pdf	Cross-Environment TPC-H Runtime Prediction: Final Results and Limitations
`results/phase8_cetp_gate_demo.md`	results/phase8_cetp_gate_demo.pdf	Phase 8 CETP Gate — Worked Demo
`results/q15_resolution.md`	results/q15_resolution.pdf	Q15 resolved (Tier 1, item 28)
`results/tier1_ablation.md`	results/tier1_ablation.pdf	Classifier ablation (Tier 1, item 19)
`results/tier1_conformal.md`	results/tier1_conformal.pdf	Calibrated prediction intervals (Tier 1, items 20, 21, 24, 29)
`results/tier1_elasticity.md`	results/tier1_elasticity.pdf	Measured resource elasticity (Tier 1, items 17 and 18)
`results/tier1_gate.md`	results/tier1_gate.pdf	Risk-derived threshold and a conformal SLA gate (Tier 1, items 22, 23)
`results/tier1_hw_signature.md`	results/tier1_hw_signature.pdf	Is a two-scalar hardware signature enough? (Tier 1, item 26)
`results/tier1_laptop_dev.md`	results/tier1_laptop_dev.pdf	arm64 laptop as the dev machine (Tier 1, item 27)
`results/tier1_plan_features.md`	results/tier1_plan_features.pdf	Do plan-structure features help? (Tier 1, item 25)
`results/tier2_concurrency.md`	results/tier2_concurrency.pdf	Concurrency sensitivity (Tier 2, item 35)
`results/tier2_versions.md`	results/tier2_versions.pdf	PostgreSQL version sensitivity (Tier 2, item 36)

Document	PDF	About
`results/tier3_cold_start.md`	results/tier3_cold_start.pdf	N3: budgeted cold start (Tier 3, item 41)
`results/tier3_plan_drift.md`	results/tier3_plan_drift.pdf	N1: plan drift (Tier 3, item 39)
`results/tier3_risk_control.md`	results/tier3_risk_control.pdf	N4: conformal risk control for the SLA gate (Tier 3, item 42)
`results/tier4_plan_drift_causal.md`	results/tier4_plan_drift_causal.pdf	Causal plan-drift decomposition (item 3)
`results/tier4_version_transfer.md`	results/tier4_version_transfer.pdf	Engine version as a transfer axis (item 5)

Reference

Document	PDF	About
`CONFERENCE_PLAN.md`	CONFERENCE_PLAN.pdf	Publication plan and venue analysis
`DATASHEET.md`	DATASHEET.pdf	Datasheet for the dataset (Gebru et al. format)
`DOC_CORRECTIONS.md`	DOC_CORRECTIONS.pdf	Itemised errors in the superseded deck and LLD
`IMPLEMENTATION_REFERENCE.md`	IMPLEMENTATION_REFERENCE.pdf	Implementation notes
`OPERATOR_MODEL.md`	OPERATOR_MODEL.pdf	Design and status of the per-operator work; what each move is worth
`OVERNIGHT_REPORT.md`	OVERNIGHT_REPORT.pdf	Report from the unattended run of 2026-10-13
`PREREGISTRATION.md`	PREREGISTRATION.pdf	What was committed to before the Tier-3 experiments ran
`QUICKSTART.md`	QUICKSTART.pdf	Condensed usage for the installed `cetp` command
`RELATED_WORK.md`	RELATED_WORK.pdf	Prior art, verified against publishers rather than quoted from memory
`ROADMAP.md`	ROADMAP.pdf	Longer-term plan
`TASKS.md`	TASKS.pdf	Full history: everything done, everything that failed, everything open
`TIER1_RESULTS.md`	TIER1_RESULTS.pdf	Tier 1 summary — method
`TIER2_RESULTS.md`	TIER2_RESULTS.pdf	Tier 2 summary — dataset
`TIER3_RESULTS.md`	TIER3_RESULTS.pdf	Tier 3 summary — research questions
`data/raw_buggy_do_not_use/README.md`	data/raw_buggy_do_not_use/README.pdf	DO NOT USE — superseded, contains a known data bug
`models/MODEL_CARD.md`	models/MODEL_CARD.pdf	What the shipped artifacts are, and are not
`scripts/collection/queries/README.md`	scripts/collection/queries/README.pdf	TPC-H queries — reconstructed 2026-10-12
